

BUILD ON STELLAR HACKATHON

Every era had its own tool.

The tool of this era: **CODE.**

ISTANBUL	JUNE 2–3	48 HOURS
----------	----------	----------

THE SOLUTION

Show how your project solves the problem.

- ◆ *Present your idea as the answer to the pain point.*
- ◆ *Why is your solution the best way to fix this?*
- ◆ *Keep it short, clear, and exciting.*

Think

Highlight what makes it unique or better than other options.

PMF

This is where you explain what real-world issue you're solving.

- ◆ Show why this problem matters — who is affected and how big the impact is.
- ◆ If possible, use numbers, examples, or stories to make it feel real.

Think

Why should anyone care about this problem?

TECHNICAL WORKFLOW

Here you explain how your solution workflow works in practice.

- ◆ Briefly describe the technology, product, or process.
- ◆ Focus on the logic and feasibility, not every technical detail.

Think

How does this actually work — and why will it succeed?

THE TEAM

Finally, explain who is behind the project.

- ◆ Highlight the skills and roles of your team members.
- ◆ Add a small picture of the team.
- ◆ Use a maximum of 3 lines for each member.

Think

Why are you the right people to solve this problem?
